

## **Hazardous and industrial waste management**

Constantly growing requirements of environmental legislation create a need for continuous adaptation and implementation of sustainable solutions for management of industrial and hazardous waste.

VentEko provides the best available technologies for collection and transportation of industrial and hazardous waste to utilization facilities.

We offer to collect, transport and deliver industrial and hazardous waste for utilization, including:

- Oil products and water emulsions
- Oil and oil product waste
- Contaminated soil
- Mercury waste
- Batteries
- Electrical and electronic equipment
